ENVIRONMENTAL ASSESSMENT (EA) AND FINDING OF NO SIGNIFICANT IMPACT  
(FONSI) – LOAN TO MATHIAS METAL SYSTEMS, HUMPHREYS COUNTY,  
TENNESSEE, FOR EQUIPMENT PURCHASE

In accordance with the *National Environmental Policy Act* (NEPA) and TVA's implementing procedures, Environmental Services and Programs has prepared the attached EA addressing the potential environmental consequences of TVA's proposed action. We conclude that the proposed action of providing a loan to Mathias Metal Systems for equipment to enable the company to produce engineered insulation and lagging systems for air pollution control equipment is not a major federal action significantly affecting the environment. Thus, an environmental impact statement is not required.
